Evening all-

We're looking forward to next week's interagency meeting on Bay Delta restoration and the BDCP. Some conflicts have arisen for the originally scheduled date and we are now zeroing in on another day later that week (looking like Wednesday, 11/7, 9:30-10:30am will work best for a core set of principals...which will be a grand time to collect ourselves as we'll have plenty to talk about after election day!). The plan is for DOI and NOAA to update the interagency on the latest progress and then we will use our time to chart how we could align interagency programs and policies around various aspects of the BDCP and associated water operations. Please find attached the agenda for the meeting. We anticipate there will be follow up from the meeting, particularly around the BDCP "plus", so we encourage you to bring any needed support (suggest a national and regional office rep). Also, in prep for the dialogue Wednesday, we would also suggest getting a briefing on the latest activities from your agency, but particularly around what items could be contemplated to advance Bay Delta restoration. As background, here is a link to the set of materials announced this past July:

And a link to the draft joint state/federal recommendations if you want to get a deeper background:

A big thanks to Robert Vandermark and the CEQ land & water interns (Helen Killeen and Kathleen Cook) for helping pull this together. We hope the shifting calendars do not cause too much hassle for you, but we also hope this will enable all to make the time. Please don't hesitate to let us know if you have any questions and let us know if there is anyone we should add to the distribution. Thank you.

JJJ

California Bay-Delta Ecosystem

As one of the President's focus on the five major ecosystems, CEQ is hosting DOI and NOAA for an interagency briefing on the latest developments surrounding the California Bay-Delta Conservation Plan. As all know, Secretary Salazar along with CA Governor Brown outlined a path forward for Bay Delta Conservation Plan on July 25th and has since been working on key elements of a proposal to achieve the dual goals of a reliable water supply for California and a healthy California Bay Delta ecosystem.

Please join us on Tuesday, November 6th at 2 PM for an update as well as to discuss how agencies can coordinate actions around the BDCP.

Agenda to follow.
